No 3143

Mysore Public Works Department,
Electrical Branch,
Bangalore, I9th September I908

To

H J Bhabha, Esq , M A ,
Inspector General of Education in Mysore, Bangalore

Dear Sir,

In accordance with your verbal request, I am pleased to send you the following memoranda on Education of young men for such work as is handled by this Department

In the first place, I would like to say that up to now so far as I am able to judge, the start has been made from the wrong end, that is, young men who have not demonstrated a practical mechanical tendency or that they are willing to work hard at manual labour for a period of years, are selected and given courses, trusting that they will prove practical afterwards

It would, I think, be very much better to select only such as really possess known qualifications, so that the theory when studied, may receive full comprehension and practical application

The most suitable man is one who has received a good education and served in a well recognised mechanical workshop such as Perambur as it should be always remembered that no amount of study will ever really fit a man to operate a plant such as Government has at the Cauvery and that the work done in the Electrical Department requires, as great a mechanical as Electrical knowledge

Men who are working in either Electrical or mechanical, will find courses such as are given by the International Correspondence Schools of marked assistance, if gone into seriously

Men who have proved themselves suitable on the work here, would be much benefited by a tour in either Europe or America or both, enabling them to see other methods of constructions and general working

It would also, I think, be very sound to select an occasional

Proceedings of the Government of His Highness th Maharaja of Mysore Local Fund and Sanitary (Education) dated 13th March 1909

READ—

Letter No 2920—193 dated the 27th September 1908 from the Inspector General of Education in Mysore submitting copy of letter No 3143 dated the 19th September 1908 from the Chief Electrical Engineer in regard to the grant of scholarships for the study of Electrical Engineering

No 3143 from the Chief Electrical Engineer

In accordance with your verbal request I am pleased to send you the following memorandum on Education of young men for such work as is handled by this Department

In the first place I would like to say that up to now so far as I am able to judge the start has been made from the wrong end that is young men who have not demonstrated a practical mechanical tendency or that they are willing to work hard at manual labour for a period of years are selected and given courses trusting that they will prove practical afterwards

It would I think be very much better to select only such as really possess known qualifications so that the theory when studied may receive full comprehension and practical application

The most suitable man is one who has received a good education and served in a well recognized mechanical workshop such as Parambur as it should always be remembered that no amount of tudy will ever really fit a man to operate a plant such as Government has at the Cauvery and that the work done in the Electrical Department requires as great a mechanical as Electrical knowledge

Men who are working in either Electrical or Mechanical will find courses such as are given by the International Correspondence Schools of marked assistance if gone into seriously

Men who have proved themselves suitable on the work here would be much benefited by a tour in either Europe or America or both enabling them to see other methods of construction and general working

It would also I think be very sound to select an occasional man from the local staff for a Government Studentship

An arrangement can I think be made with the new Institute in Bangalore to give local men on the work special courses in Electrical Engineering

I do not believe that the courses at the Victoria Jubilee Institute are of much value as their standard of requirement is too low

Finally I would say that I believe the example of the European in India has often been exceedingly bad and has taught Natives that work is not compatible with social standing If an example is set by hard working experts I believe that good local men can be turned out and feel that it is most essential that the greatest of care should be exerted in providing for their education and early training and also in affording the best of example and precept.
